Business Head- Cosmo Films

Experience - Over 20 years of experience in the areas of Business & Strategy Management, Sales and Financial management.

Education - B.Com (H) from SRCC, a Qualified Chartered Accountant and holds Diploma in International Management and Strategy from Oxford University (UK) and Thunderbird School of Global Management, Arizona (Phoenix, USA).

Mr. Sanjay Chincholikar

Business Head- Technical Films & Rigid Packaging – Cosmo Plastech & Cosmo sunshield

Experience - Over 39 years of experience in the fields of manufacturing, engineering, projects and quality control.

Education - Mechanical engineer and Bachelor of Commerce graduate. A postgraduate in Sales and Marketing.

Mr. Sushen Roy

Business Head - B2C Pets Business - Zigly

Experience - 22 years of experience working as a marketer, business developer & transformation specialist.

Education - MBA (International Business) from IIFT (Indian Institute of Foreign Trade) with majors in Strategy and marketing and B.E. from the Institution of Engineers, Delhi.

Dr. Raj Sharma

Business Head- Cosmo Speciality Chemicals

Experience - 25 years of experience in building profitable businesses across the Asia Pacific Region for Global Specialty Chemical Companies. .

Education - B.Tech & MBA by qualification.

Leadership Team

Mr. Neeraj Jain

Group Chief Financial Officer

Experience - Over 17 year of experience in workingWith large manufacturing and service industries.

Education - Bachelor of Commerce from DU and a qualified Chartered Accountant.

Ms. Ashima Roona

Head- Human Resources

Experience - Over 16 years of experience in different Human Resource Verticals.

Education - MBA (PGDPM) from XISS, Ranchi and graduate from Jesus and Mary College, DU.

Mr. Sriram Arthanari

Head - IT

Experience – 10+ years of experience as Program & Project Management, Tech implementations for SAP, Sales & Distribution Modules, Data Governance, among others.

Education - B.E. from College of Engineering, Guindy and MBA from IIT – Bombay.

Milestones

1981 - 2000

- 1st BOPP Line
- 2nd BOPP Line
- 3rd BOPP Line

2001 - 2005

- 4th BOPP Line
- Acquired Gujarat Propack Ltd
- 5th BOPP Line
- 6th BOPP Line
- 7th BOPP line
- 1st Extrusion Coating line
- 1st Metalizer line
- 2nd Extrusion Coating line

2006- 2010

- 2nd Extrusion Coating line
- 3rd & 4th Extrusion Coating line
- 1st Coating Line
- Gas based electricity generation unit
- 5th Extrusion Coating line
- 6th & 7th Extrusion Coating line
- Acquired GBC Commercial
- 8th BOPP Line
- 2nd Metalizer Line

2011 - 2016

- New plant in South Korea
- 9th Extrusion Coating line
- 2nd Coating Line
- 9th BOPP Line
- 10th Extrusion Coating Line
- 3rd Coating line
- 4th & 5th Coating line
- 3rd Metalizer Line
- Upgradation of US Plant

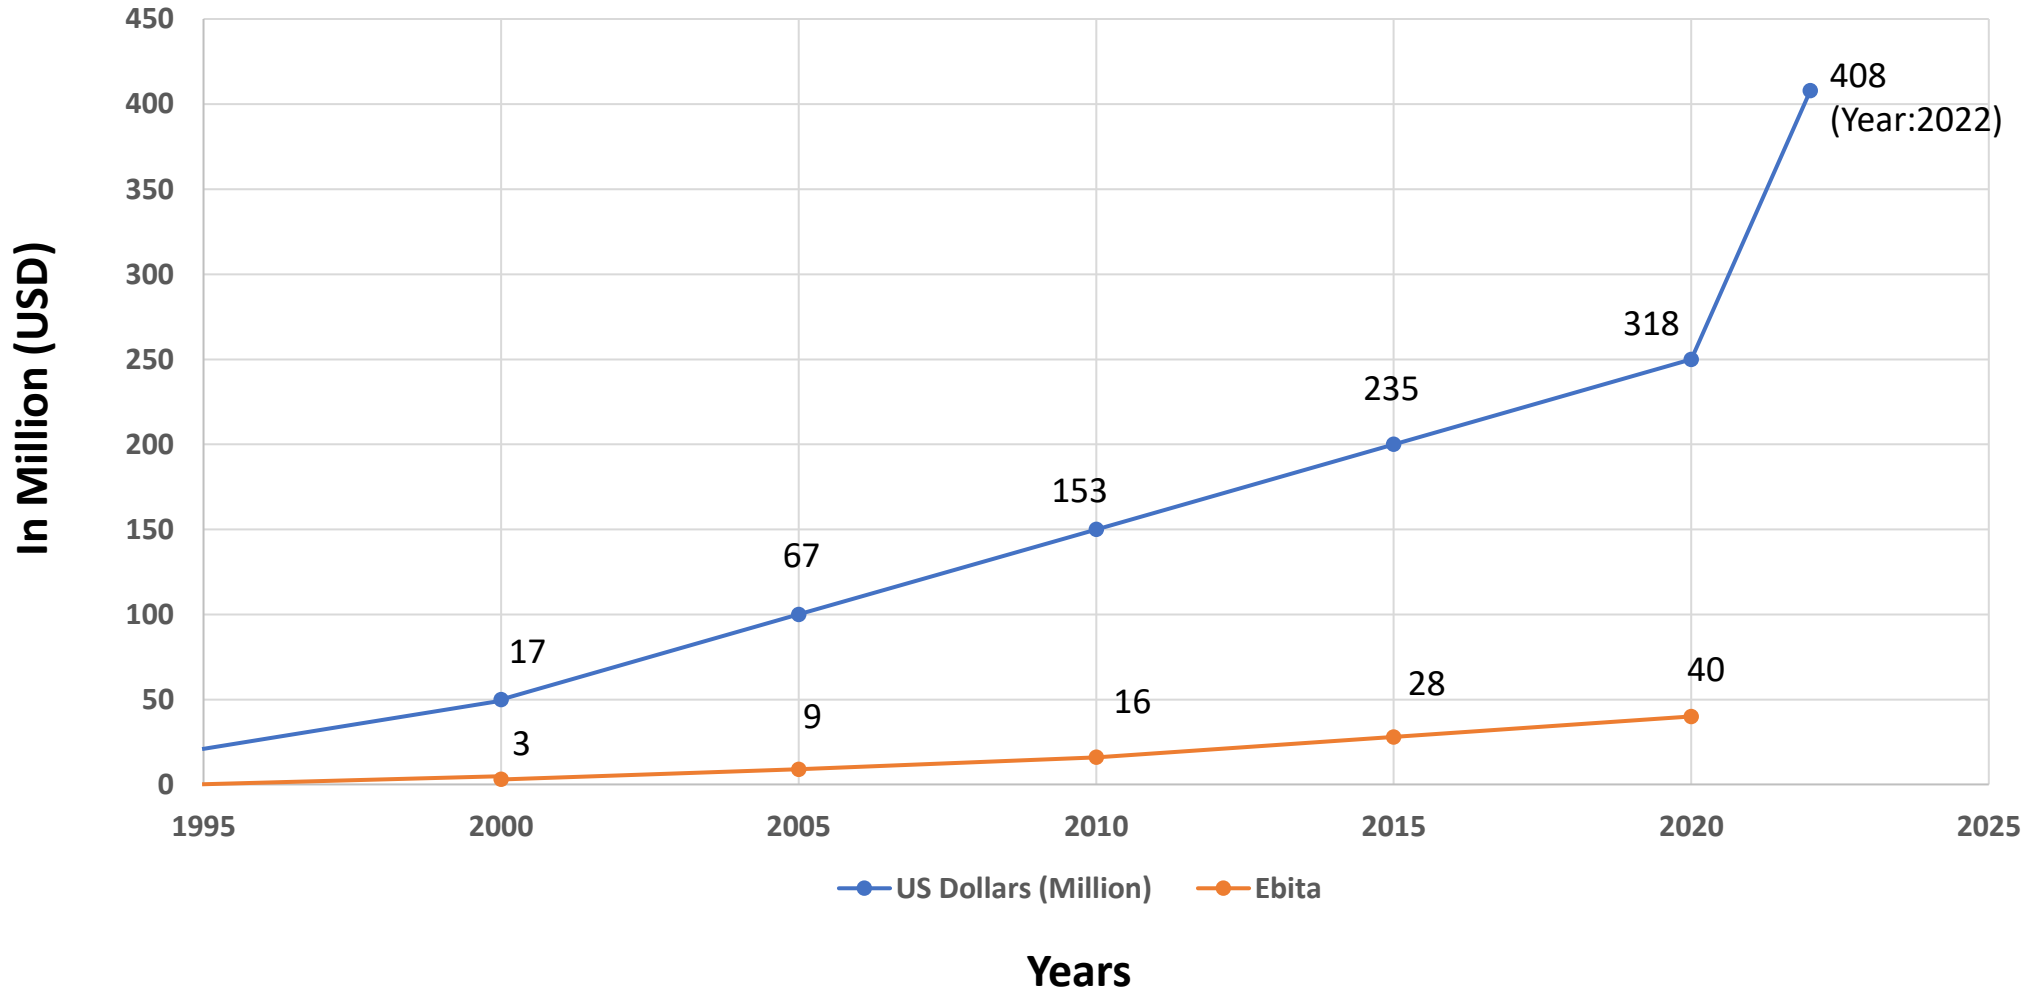

2017 - 2020

- 1st CPP line
- 10th BOPP Line
- 2nd CPP line
- 4th Metalizer and 2nd Lamination (Solvent Less) Line
- 6th Coating Line
- Launch of Cosmo Speciality Chemicals

2021 - 2025

- Launched Zigly
- Launched Cosmo Plastech
- Launched Cosmo Sunshield
- 1st BOPET Line
- 3 Metallizer Lines*
- 11th BOPP Line*
- 3rd CPP Line*

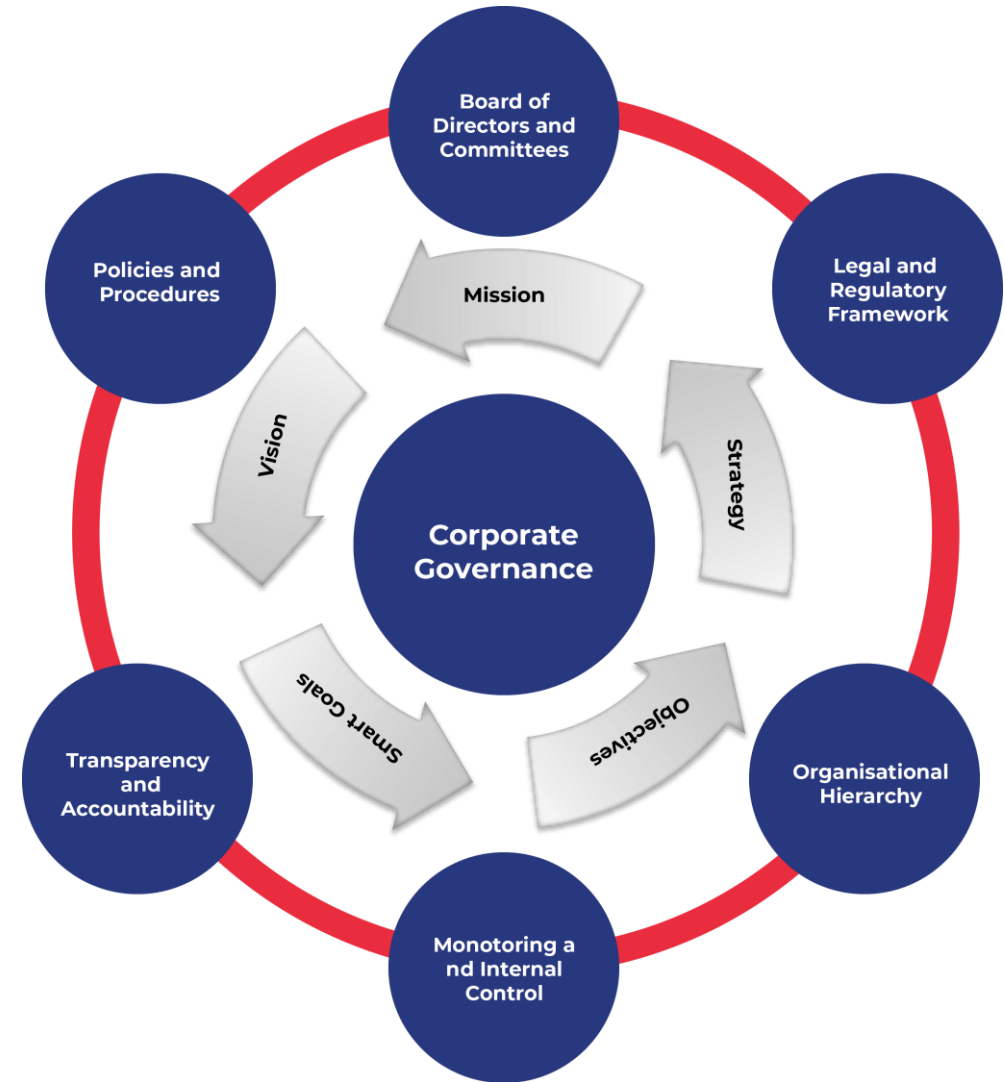

Financials - Overview

Corporate Governance

Well-established practices in place

- Well qualified Board of Directors from diversified fields with the majority of directors being independent.
- Independent Audit Committee with the Board of Directors.
- Established risk management practices.
- Experienced and independent internal audit function.
- Active POSH and Whistle Blower Policy.

Sustainable Manufacturing Practices

Recycling of manufacturing waste for further film production as well as packing materials such as cores, hollow sheets etc.

Constant monitoring of parameters like noise, illumination, ventilation, air quality etc.

All plants use some amount of renewable as a source of energy.

Continuous efforts to reduce water usage, waste generation and GHG emissions.

Rainwater harvesting and reuse of effluent treated water.

Petcare brand Zigly turns one, celebrates by feeding strays

Zigly has celebrated its first anniversary by celebrating the anniversary of its petcare products. The brand, known for its petcare products, has celebrated its first anniversary by celebrating the anniversary of its petcare products. The brand, known for its petcare products, has celebrated its first anniversary by celebrating the anniversary of its petcare products.

Sustainability in the textile industry

Textile industry, in India and across the globe, ranks first in terms of the volume of wastewater emitted. Therefore, textile businesses have to consider going green by opting for sustainable options, says Pankaj Fodder.

GREEN TEXTILES

Environmentally friendly, including ways to protect the supply chain, sustainable energy practices, and efforts to reduce carbon footprint. There is also a need for a corporate responsibility effort to govern the company's actions. It is imperative for leaders to discuss and implement strategies on how to manufacture sustainably. The company should take decisions to shift to solar energy, use green energy facilities, gather natural fibres more responsibly, and even shift to water runoff. Corporate responsible initiatives will be shaped by each of the steps detailed below.

Filteration of wastewater: Natural fibre collection and cleaning can be a messy process. If water is being washed, it should be made sure that dirty water or cleaning detergents are used. It must not allow contaminated water to return to the land. Chemicals cannot be used to clean these fibres since the chemicals will be released into the air when the clothes are dried, it can cause twice the environmental damage, and any excess water that exits the processing plant must be filtered because it can't be filled with chemicals.

Energy from renewable sources: Factories consume a lot of energy in their facilities, and there is a need to supplement it with solar or wind energy. Using renewable energy can save organisations a lot of money, and all of the energy systems can run on solar or wind power. Even a solar-powered water pump could deliver water to a nearby source into the factory by using renewable energy, the environment is being helped. These strategies can be used by companies to leverage sales.

Recycling: While the use of recycled materials, there is fewer consumption of resources from the environment. Rinsing and harvesting wool or other fibres is highly costly. Cotton is bad for the environment because of the farming that goes into it. By switching to more environmentally friendly manufacturing methods, and by altering of the facilities by incorporating these different manufacturing styles a new site can be formed.

Water: Textile businesses who are looking for sustainable options have to consider going green in the textile industry. One cannot afford to buy raw materials every year of a rising cost, and will have to figure out a technique to recover or recycle resources that are appropriate for the business. There are various initiatives that can be taken to make factories more

IF I'M NOT BETTER THAN MY COMPETITION, I'VE PROBLEMS - ASHOK JAIPURIA OF COSMO FILMS

Is plastic the villain?

Environmentalists have been quick to label plastic as the villain of the modern age. But is it really? Or is it just a victim of its own success? The answer lies in how we use it. Plastic is a versatile material that has revolutionized our lives. From packaging to construction, it has become an indispensable part of our daily lives. However, the environmental impact of plastic has become a major concern. The production and disposal of plastic contribute to global warming and pollution. But is it really the villain? Or is it just a victim of its own success? The answer lies in how we use it. Plastic is a versatile material that has revolutionized our lives. From packaging to construction, it has become an indispensable part of our daily lives. However, the environmental impact of plastic has become a major concern. Cosmo Films Diversification and innovation

Proposed to be made its position as the leading global company in the world for the second consecutive year, according to the International Business Times, India continues to be the strongest to emerge. The company has announced to expand by 20% by 2020, following 10% growth in 2021, and expects to reach 10% by 2022. While the growth in 2021 was driven by the petcare products, the company's growth in 2022 is expected to be driven by the petcare products, the company's growth in 2022 is expected to be driven by the petcare products, the company's growth in 2022 is expected to be driven by the petcare products.

Cosmo Synthetic Paper

SYNTHETIC PAPER

Cosmo Synthetic Paper is a co-extruded, white opaque, polypropylene-based film that resembles paper in appearance. It is non-tearable with excellent resistance to moisture & chemicals. It is printable with most of the existing printing technologies & is writable with oil-based pens.

Cosmo Synthetic Paper keeps sustainability at its core, recognizing it as the need of the hour. This is echoed in a manufacturing process that helps in water conservation, prevents air pollution & shuns the use of hazardous chemicals.

COSMO PLASTECH

Designed to protect

What is Cosmo Plastech?

Started In 2023, Cosmo Plastech is the end-to-end rigid packaging solutions division of Cosmo Films that specializes in creating customized packaging solutions for a variety of fast-moving consumer goods (FMCG) products. At Cosmo Plastech, we use injection molding and thermoforming techniques to manufacture our products, which are made from high-quality materials to ensure durability and reliability.

Cosmo Plastech works closely with their clients to understand their specific packaging needs, and then designs and manufactures customized containers to meet those needs. Our expertise in injection molding and thermoforming techniques, as well as our BOPP based film, makes us a trusted partner for many companies in across the globe.

*First Organized Player in the industry

*Backward Integration

Why Cosmo Plastech?

Cosmo Plastech's ability to provide customized solutions with high-quality and precision accuracy along with our R&D strengths sets us apart from others.

- Speciality Sheet Extrusion
- High speed Automated Thermoforming
- Automated Injection Moulding
- 8 colour printing machines for printing on round containers
- Pre-printed shrink sleeve applicators
- IML on injection molded containers

Our ability to provide customized solutions to make your packaging supply chain circular, sustainable and recyclabl

Latest technology

Highest level of precision accuracy across the industry

What makes us stand out?

40 years of proven record in R&D

State of the art machinery and equipment

Global footprint with presence in 100+ countries

Highest focus on sustainability and circular economy

Our Product Portfolio

THERMOFORMING

Highly technology-driven process employing state-of-the-art machinery to shape sustainable BOPP/ CPP/ BOPET bases polymers into desired forms. The use of advanced equipment and automated systems ensures accuracy, speed, and consistency in the production of thermoformed products

INJECTION MOLDING

A technology-driven process that utilizes advanced machinery to produce high-quality, customized products with exceptional precision. With the ability to adjust settings for each individual project, our injection molding solutions offers endless possibilities for customization

Thermoforming

THERMOFORMED ROUND CONTAINER

Size Range - 50 ml - 1000 ml

Application - Dairy, Ice-cream, Food Packaging

THERMOFORMED RECTANGLE CONTAINER

Size Range - 100 am - 1000 am

Application- Dairy, Ice-cream, Food Packaging & Ethnic Sweets

Injection Moulding

MOULDED CONTAINER (ROUND, RECTANGLE & OVAL)

Size Range - 100 gm - 4.0 kg

Application - Dairy, Ice-cream, Food Packaging & Ethnic Sweets

TAMPER PROOF & ML CONTAINERS

Size Range - 100 am - 4.0 kg

Application - Ice-cream, Food Packaging, Ghee & Ethnic Sweets

COSMO SUNSHIELD

SAVE • PROTECT • ENHANCE

Who are we?

Cosmo Sunshield is a window film business that offers a wide range of window film solutions for residential, commercial, and automotive applications. The company is committed to providing high-quality window films that are designed to reduce heat, glare, and UV rays while increasing energy efficiency and improving the aesthetics of buildings and vehicles.

The main advantages of Cosmo Sunshield's window films is their ability to block up to 99% of harmful UV rays, reduce heat and glare. This can make indoor spaces more comfortable and reduce the need for air conditioning, which can lower energy costs. Additionally, the company's films can enhance privacy, increase security, and improve the appearance of buildings and vehicles.

Cosmo Sunshield offers a variety of window film solutions, including solar control films, safety and security films, decorative films, and automotive films. The company's products are available in a range of colors and styles to suit different needs and preferences.

Our Portfolio and Core Features

OUR PORTFOLIO

There are numerous types of window films available that can enhance the energy efficiency of your glass as well as alter its appearance. We're here to help you sift through the great deal of data available on window films so you can make the best choice for your house or company.

Digital Overview

OUR ONLINE PLATFORM OFFERS PRODUCTS (THROUGH ITS MULTIBRAND STORE), AND IS AN AGGREGATOR OF INDEPENDENT TRAINED PET CAREGIVERS, FOR PET CARE SERVICES

- Digital first approach
- Holistic approach to pet care and aim to service life time value of a pet
- A personalized pet care experience to be at core with other curated offerings through technology
- A community to build brand equity and fuel category growth

Offline Overview

Our Experience Centers will serve as the primary POC for first-time pet families to start their parenting journey and an essential care delivery touch point for services that require more elaborate infrastructure

- The Experience Centre will act as an important hub and integrating point for a unified pet care experience for pet families.
- The aim is to create a center that becomes an important occasional fixture for pet care services which cannot be delivered at home with ease.
- As of now Zigly has 24 centers across India (Delhi, Chandigarh, Karnataka, Uttar Pradesh, Madhya Pradesh, Uttarakhand, Haryana)..

Zigly Experience Center: The definition of premium pet care
