# Demand-Supply Dynamics and Capacity Expansion

- ❑ Global BOPP demand is estimated to be approx. 7.8 million MT per annum
- ❑ The global demand and supply are broadly balanced except China

- ❑ Currently India BOPP production capability is estimated at approx. 575k MT per annum.
- ❑ India domestic BOPP consumption is approx. 410k-440k MT per annum and remaining is being exported.
- ❑ Indian BOPP Industry has been growing at almost double of the India's GDP growth rate.

Strong domestic and global demand is helping efficient capacity utilisation.

In line with strong demand fundamentals, Cosmo Films has implemented an increase in capacity by 60k MT p.a. in early Feb 2017 with 10.4 meter width state of art BOPP line, which is one of the lowest cost producing line in the world.

## India BOPP Demand & Supply Dynamics:

- ❑ Considering low packaged food penetration in India and rising personal disposable income, the Industry is estimated to grow fast.
- ❑ Investment in organized retail industry and change in pack format from rigid to flexible is going to further add to increasing demand.
- ❑ Based on capacity addition announced in India, new capacity expected in the Industry may not be able to address growing India demand. On current India BOPP Industry demand base, one new line each year may not be sufficient to address India's growing demand.

- ✓ New capacity addition in FY 12-13 impacted margins temporarily in India, which is now totally reversed.
- ✓ FY 16-17 revenue fell marginally though the volume increased by 5% due to pass through impact of drop in raw material prices and drop in commodity margins. Commodity margins had one of the lowest run with a drop of almost 35% in the last year. The impact from lower margins was compensated by significant growth in speciality sales & operational efficiency improvements.
- ✓ Consolidation results in FY 16-17 were adversely impacted mainly by one time items. Subsidiaries operationally continues to be on improving trend.

## Key Highlights - Q1, FY17-18 Results

- ✓ Increase in revenue could have been higher but for the de-stocking and deferment of purchases by customers in June in preparation for GST. The GST transition had also affected the margins. The declining raw material prices led to one time stock loss of Rs.5.3 crores in the Quarter. GST impact is expected to get stabilized within Q2FY18.
- ✓ The Company could partly compensate the above adverse impacts by more than 25% increase in Speciality Films and additional volume from the new line commissioned in Feb 2017.
- ✓ The new BOPP Line is expected to operate at full capacity from mid of Q2 FY18 and should help improve the profitability.
