❑ India BOPP Demand & Supply Dynamics:

- ✓ Indian BOPP Industry has been growing at almost double of the India GDP growth rate. Considering low packaged food penetration in India and rising personal disposable income, the Industry is estimated to grow fast.
- ✓ Investment in organized retail industry and change in pack format from rigid to flexible is going to further add to increasing demand.
- ✓ Based on capacity addition announced in India, new capacity expected in the Industry may not be able to address growing India demand. On current India BOPP Industry demand base, one new line each year may not be sufficient to address India's growing demand.

❑ Strong domestic and global demand is helping efficient capacity utilisation, hence enhanced EBITDA margins (margin improvement trend is already being witnessed from last few quarters).

❑ In line with strong demand fundamentals, Cosmo Films is planning an increase in capacity by 60k MT p.a. with 10.4 meter width state of art BOPP line, which is one of the lowest cost producing line in the world.

❑ Capacity expansion of about INR 200 crores with one of the world's lowest cost production capability.

*EPS for Q1 FY 15-16 is calculated on the basis of trailing 12 months results

- ✓ New capacity addition in FY 12-13 impacted margins temporarily in India, which is now totally reversed
- ✓ Consolidation results were adversely impacted by USA subsidiary, which has turned around completely

Structural Shift in EBIDTA levels

A trend visible over the last few quarters due to....

- ❑ Improving Product Mix towards Value Add, with consequently better margins
- ❑ Sustainable reduction in variable cost (approx INR 20 crores pa)
- ❑ Increase in manufacturing lines efficiency leading to higher production from existing lines
- ❑ Fixed Cost rationalization (Substantially lower increase in human resources expenses compared to turnover)
- ❑ USA Subsidiary Turnaround, leading to better consolidated results
- ❑ New planned capacity expansion of about INR 200 crores with one of the world's lowest cost production capability, at low financing cost, would further help higher asset turnover along with **improved operating margins and better return ratios.**
